PROJECTS

Sharing With Benefits

MongoDB, NodeJS, Jwt, ReactJS

Developed a site for users who wants to post an ongoing offer and share the minimum price with other users and get benefitted with the offer. Created mongo models for the user and offer where users can upload image of an offer. Connected interested users with a chat option using socket.io.

E-Commerce

MongoDB, Mongoose, NodeJS, ReactJS

Built an e-commerce site which has a user functionality such as Sign in/Signup. Incorporated Add product to the cart feature also included Checkout feature post the entry of shipping and payment details.

Patatap Clone

paperJS, HowlerJS, paperscript, HTML, CSS

Patatap is a portable animation and sound kit. When users hit a key on a keyboard melodies charged with animated circles are generated. Utilized the functions in howlerJS to produce sound and paperJS to create animation.
